Muhammad Qaissum Shahaab

Full Stack MERN Developer

PROFESSIONAL SUMMARY

Passionate Full Stack MERN Developer with **1+ year of hands-on experience** architecting and shipping scalable web applications, custom eCommerce platforms, and high-performance REST APIs. Adept at translating complex product requirements into clean, maintainable code across the entire JavaScript stack. I thrive at the intersection of **clean architecture, intuitive UX, and relentless performance optimisation** — delivering production-ready software that clients can rely on.

EXPERIENCE

Freelance Full Stack MERN Developer

Self-Employed · Remote · Jan 2024 – Present

- Designed and delivered 5+ full-stack web apps for international clients using React, Node & MongoDB.
- Built custom eCommerce solutions with Stripe payment integration, cart logic, and order management.
- Developed RESTful APIs consumed by both web and mobile front-ends with JWT authentication.
- Reduced average page load time by 40% through code-splitting, lazy loading, and query optimisation.

FEATURED PROJECTS

ShopSphere — Full-Stack eCommerce Platform

React · Node · MongoDB · Stripe

End-to-end eCommerce solution with product catalogue, cart, Stripe checkout, admin dashboard, order tracking, and JWT-secured user auth. Deployed on Vercel + Railway with 99.9% uptime.

TaskFlow — Project Management SaaS

Next.js · Express · MongoDB

Kanban-style SaaS app with drag-and-drop boards, real-time updates via Socket.io, role-based access control, and a responsive dashboard. Supports multi-workspace team collaboration.

DevBlog CMS — Headless Content Platform

React · Node · MongoDB

Custom headless CMS for developer blogs with rich-text editor, SEO meta management, category tagging, image optimisation, and an analytics dashboard for authors.

CORE SPECIALISATIONS

- Custom eCommerce Platforms
- REST API Development
- Responsive UI/UX Interfaces
- Full-Stack Web Applications
- Stripe & Payment Integrations
- Performance Optimisation
